should be adopted, ENO filed a Motion and Incorporated Memorandum to Amend the Procedural Schedule and Request an Evidentiary Hearing Regarding Consolidated Billing seeking an opportunity to "create an evidentiary record and have a full evidentiary hearing such that the Council can determine the public interest and other threshold issues"[1] ; and
WHEREAS, Together New Orleans ("TNO") filed an opposition to ENO's motion on behalf of several other intervenors arguing that ENO had already "been afforded ample procedural opportunity through a transparent, multi-year rulemaking process" which included discovery, a technical conference, multiple rounds of written filings and a comprehensive Advisors' Report[2] ; and
WHEREAS, although the Hearing Officer was not entirely convinced that ENO was due any additional process, in an abundance of caution, some additional evidentiary process was provided to satisfy ENO's due process concerns; and
WHEREAS, the additional evidentiary process included opportunities for the parties and the Advisors to conduct further discovery, file written, sworn testimony, and submit post-testimony briefs and reply briefs; and
WHEREAS, in the additional evidentiary process, ENO witnesses argued that implementing consolidated billing for the New Orleans community solar program would not serve the public interest[3]. Several drawbacks to consolidated billing for community solar identified by ENO and Air Products included (1) the risk of increased costs being imposed on non-participating customers of the utility[4]; (2) ENO's billing system cannot accommodate consolidated billing and must be updated[5]; (3) implementing consolidated billing without a clear cost estimate exposes customers to an open-ended financial burden because ratepayers would be expected to subsidize system development and ongoing billing operations for non-utility commercial activity without evidence that the benefits outweigh the costs[6]; (4) additional burdens would be imposed on ENO'scall centers which would receive the bulk of customer inquiries about community solar but would not be prepared to explain the basis for reduced credits[7]; and (5) that consolidated billing may impact other areas of customer care such as budget billing and rules for shut-off for non-payment[8]; and
WHEREAS, Witness Arreola-Lennox, on behalf of TNO, Alliance for Affordable Energy ("AAE") and SunConnect, argued that many of the potential drawbacks of community solar identified by ENO apply to other forms of consolidated billing, rather than consolidated billing with net crediting[9]; and
WHEREAS, with respect to Net Crediting Consolidated Billing, Witness Arreola-Lennox listed the following benefits, as compared with dual billing: (1) clear, predictable, and reliable customer savings reflected directly on the utility bill; (2) strong customer protection through guaranteed savings; (3) reduced billing confusion and a decrease in customer complaints compared to dual billing; (4) lower utility receivables and reduced collections risks; and (5) greater revenue certainty for projects, supporting long-term market stability and investment attractiveness[10]; and

[9] Arreola-Lennox Testimony at 5:6-8.
[10] Arreola-Lennox Testimony at 5:11-19.

WHEREAS, the Advisors asserted that properly designed consolidated billing for community solar with net crediting and guaranteed savings could be adopted and largely avoid the potentially negative aspects of consolidated billing; and
WHEREAS, after closely evaluating and considering the evidentiary record developed in this proceeding, the Council finds that the positive benefits of Net Crediting Consolidated Billing outweigh the concerns raised by the parties opposed to consolidated billing and the adoption of Net Crediting Consolidated Billing is therefore in the public interest; and
WHEREAS, considering the Advisors and other parties, including ENO, fully participated without objection in the additional evidentiary process established by the Hearing Officer, the Council finds that ENO's due process claims are moot; and
WHEREAS, the Council has also considered other legal claims made by ENO in this docket, including alleged violations of ENO's property rights, assertions of infringement on ENO's franchise rights, and contentions that consolidated billing is not in the public interest; and
WHEREAS, ENO alleged that its property interests would be adversely affected by the Council's consideration and potential adoption of consolidated billing and further claimed that a full evidentiary hearing was required to properly consider whether consolidated billing should be adopted; and
WHEREAS, the Advisors responded that ENO had not articulated how its property rights would be affected by the Council's consideration of consolidated billing and even if ENO's property rights had been impacted (which they had not), ENO had numerous opportunities, including an extended evidentiary process established by the Hearing Officer to provide information and sworn testimony to assist the Council with its decision; and
WHEREAS, the Council rejects ENO's property interest argument as unsupported since ENO's property was unaffected by the Council's deliberation and its decision in this resolution to require ENO to implement consolidated billing as part of the approved community solar program; and
WHEREAS, ENO also asserted that Intervenors in this docket indicated that they intended to market and sell generation services directly to ENO's existing customers in a manner that could be characterized as competition with ENO's electric service; and
WHEREAS, the Advisors contended that the existing Community Solar Rules reinforce the prohibition against the sale of electricity by the CSG Facility to anyone other than ENO; and
WHEREAS, several Intervenors argued that ENO's franchise rights are not threatened by consolidated billing, and further acknowledged that consolidated billing does not make SOs utilities, nor does it authorize them to sell electric distribution service; and
WHEREAS, after considering the parties' arguments, the Council finds that the existing Community Solar Rules and a carefully designed consolidated billing program would not permit competition in retail electric service or violate ENO's franchise rights; and
WHEREAS, the Council finds that ENO's arguments concerning due process, property rights, franchise rights, and public interest concerns are not substantiated and the Council has full legal authority to require consolidated billing as a matter of utility regulation and as a result of the extensive proceedings in this docket. The Council has reviewed the arguments of ENO, the parties, and the Advisors regarding these issues and concludes that the implementation of consolidated billing as part of the community solar program is in the public interest and shall be adopted consistent with proposed changes to the existing community solar rules; and
WHEREAS, in a June 10, 2025, filing, ENO stated that consolidated billing could be implemented within an eight (8) month period, which the other parties largely agreed would be reasonable; and
WHEREAS, in subsequent comments, reply comments, and witness testimony, ENO asserted, with very little explanation, that they should be allowed fourteen (14) months to implement consolidated billing, to which many other parties objected; and
WHEREAS, the Council finds that, without additional explanation to justify a longer timeframe, an eight (8) month implementation timeline is reasonable; and
WHEREAS, the Council notes that several proposals made by the parties fell outside of the Council's instruction that in this phase of the community solar proceedings, the Council would only consider arguments related to the adoption of consolidated billing. The Council concurs with the Advisors' assessments of such proposals and will not address those proposals that are beyond the scope of this proceeding; and
WHEREAS, on June 30, 2026, during the joint meeting of the Climate Change and Sustainability Committee and the Public Works, Sanitation, and Environment Committee, the committees discussed a resolution, adopting net crediting consolidated billing for the Community Solar Program; and
WHEREAS, on July 8, 2026, Together New Orleans ("TNO") and ENO submitted a letter
requesting the Council defer the resolution from the July 9, 2026 regular meeting "to facilitate collaborative discussions and working sessions aimed at confecting an implementation methodology for community solar billing"; and
WHEREAS, on July 29, 2026, TNO, ENO, and SunConnect jointly submitted proposed redlines to Resolution R-26-275 for the Council's consideration ("Proposed Redlines"); and
WHEREAS, on August 4, 2026, Air Products requested the Council defer the Resolution "to review and respond to the redlines"; and
WHEREAS, the Council adopted Resolution No. R-26-320 in order to provide the parties with an opportunity to review and respond to the Proposed Redlines; and
WHEREAS, several parties filed comments in response to the Proposed Redlines, including Air Products and Chemicals, who oppose the incorporation of TNO/ENO's changes; and
WHEREAS, Air Products and Chemicals opposes the Proposed Redlines for a variety of reasons including the provision allowing uncollected implementation costs to be collected through the fuel adjustment clause; and
WHEREAS, the Council agrees that uncollected implementation costs should not be recovered from ratepayers through the fuel adjustment clause; and
WHEREAS, based upon the record in these proceedings, it is the Council's intent to adopt a consolidated billing program, and to direct ENO to implement the necessary technical and administrative systems within a defined timeframe, subject to Council review and oversight; NOW THEREFORE
BE IT RESOLVED BY THE COUNCIL OF THE CITY OF NEW ORLEANS:
That the Council **ADOPTS**, as in the public interest, Net Crediting Consolidated Billing for the community solar program, to be administered by ENO, in accordance with the directions set forth herein. The Council further directs that the program shall include the following features:
1. Net Crediting Consolidated Billing shall be the billing structure for all SOs.
2. Separate Utility Administrative Fees shall recover upfront implementation costs and ongoing administrative costs. The upfront Utility Administrative Fee shall initially be based on the upper end of ENO's Class 3 estimate and allocated as a dollar-per-kW-AC charge based on the overall program capacity limit. Once actual implementation costs are known, the fee shall be trued up to actual, prudently incurred costs, revised accordingly for subsequent CSG Facilities, and any overcollection refunded. If any approved upfront costs remain unrecovered after five years, ENO shall make a filing with the Council providing a detailed accounting of the upfront costs incurred, the amount collected (including the sources of said collection) from the upfront Utility Administrative Fee, and the uncollected outstanding balance. The filing shall also include ENO's proposal for recovering the uncollected portion of upfront costs in a manner that mitigates the impact on ratepayers who are not subscribers in the Community Solar Program. The ongoing fee shall be initially set at 0.375% and annually trued-up based on annual O&M expenses, necessary incremental staffing, and projected CSG Facility energy production. Any undercollection shall be tracked at ENO's WACC, and the fee shall not increase by more than one hundred percent during the first three years.
3. A minimum guaranteed savings rate of 10% for all customer classes, and allowing SOs to offer 10%, 15% or 20% Guaranteed Savings. Each Subscriber group within a CSG Facility project shall receive a single Guaranteed Savings Rate. However, an SO may provide different Guaranteed Savings Rates to different Subscriber groups, including different rates for Low-Income and non-Low-Income Subscribers. Guaranteed Savings Rates shall be calculated as a percentage of the Subscriber's Allocated Credit.
4. No change to the current Community Solar Rules customer eligibility requirements (i.e. any customer in any customer class with an active account with the utility is eligible to be a Subscriber).
5. No change to the current Community Solar Rules requirement that the utility post credits to customer bills on a two-month lag.
6. Net Credits accrued during a temporary disconnection shall be applied to the Subscriber's account, and the corresponding payments to the SO shall continue as usual. A Subscriber shall be removed after two temporary disconnections for nonpayment within a twelve-month period. Upon account closure, accrued Net Credits shall be applied to the final bill, the corresponding payment shall be made to the SO, and the Subscriber may be replaced.
7. If a CSG Facility is ready to operate before Net Crediting Consolidated Billing is available to that Facility, ENO and the SO may, with Council approval, enter into a temporary billing, crediting, power purchase, or other compensation arrangement. The arrangement may vary from otherwise applicable requirements and shall terminate when the Facility transitions to Net Crediting Consolidated Billing or as otherwise ordered by the Council.
BE IT FURTHER RESOLVED BY THE COUNCIL OF THE CITY OF NEW ORLEANS, That the Council ADOPTS the proposed changes to the Community Solar Rules attached hereto in redline form as Attachment A to this Resolution and in clean form as Attachment B.
BE IT FURTHER RESOLVED BY THE COUNCIL OF THE CITY OF NEW ORLEANS, That
1. ENO is directed to file within sixty (60) days of the adoption of this Resolution separate detailed estimates of the upfront coding and implementation costs and the annual ongoing O&M and incremental staffing costs required to implement and administer consolidated billing.
2. ENO is directed to file within sixty (60) days of the adoption of this resolution, a Compliance Implementation Plan including:
a. a detailed implementation timeline and milestones wherein ENO will implement consolidated billing no later than March 30, 2027. If ENO fails to implement consolidated billing by March 30, 2027, the Council, in its discretion, may require ENO to show cause as to why the deadline was not met and why appropriate penalties should not be assessed;
b. a detailed plan for converting all participating customers to consolidated billing within ninety (90) days of implementation;
c. tariff modifications necessary to establish consolidated billing;
d. a cost recovery proposal consistent with this Resolution, including the upfront dollar-per-kW-AC Utility Administrative Fee, the ongoing percentage Utility Administrative Fee, the methodology for true-up of the upfront fee to actual, prudently incurred costs, and the specific ENO subaccounts in which the related costs, collections, and undercollections will be recorded; and
e. an operational readiness assessment for billing and data systems.
3. ENO is directed to file monthly status reports, served on the service list in this docket, detailing progress on implementation, system performance, and community solar program customer participation rates.
4. After two years of program operation, ENO is directed to file an Evaluation Report analyzing (a) total program participation; (b) upfront and ongoing administrative costs and revenues collected under the applicable administrative fees; (c) verified customer savings; and (d) any operational challenges or billing disputes encountered. Based upon this Evaluation Report the Council may adjust the administrative fees, modify crediting structures, or order additional safeguards as necessary to protect ratepayers and ensure continued success of the Community Solar Program.
5. During the implementation timeline contemplated by this Resolution, ENO and the SOs are directed to work collaboratively on a path toward implementation. If, during the course of this work, ENO or any SO identifies modifications to the Community Solar Rules that would simplify, expedite, or reduce the cost of implementation or ongoing program administration, ENO or the SOs may propose those modifications to the Council Utilities Regulatory Office, Advisors, and the Council for consideration.
6. This resolution shall take effect immediately upon adoption by the Council. ENO shall begin program implementation in accordance with the deadlines established herein.
